General description of the Plan

This is a non-linked, non-participating, variable fund based group superannuation policy. It covers both types of superannuation schemes: Defined Benefit (DB) and Defined Contribution (DC). In a Defined Contribution (DC) Scheme, the benefits payable at retirement are not defined and depend upon the contributions and investment earnings at retirement. In a Defined Benefit (DB) Scheme, the benefits are a function of the final salary and are pre-defined.

The benefits payable under the product are governed by the trust deed and rules of the individual employer's superannuation scheme and the quantum of benefits payable will vary for each individual employer. However, the liability of the insurer under any of the contingencies under a Group Superannuation policy will be limited to the maximum of the Policy Account value or the premiums/contributions accumulated (on a pro-rata basis) at the minimum guaranteed interest rate less any surrender charges and applicable service tax and education cess.

The premiums/contributions received from the Master Policyholder will be invested according to the IRDA Investment Regulations in respect of Pension and General Annuity Business.

This product provides a minimum guaranteed interest rate of 0.01% p.a. on the premiums/contributions paid into the Policy Account.

This product has:

- i. Guaranteed non-zero positive interest rate, referred as Minimum Floor Rate equal to 2.5% p.a. This Minimum Floor Rate is guaranteed for the entire term of the policy accumulating on the balance of the Policy account and the corresponding interest amount will be credited to the policy account at the end of every financial year or at the time of separation whichever is earlier on pro-rata basis.
- ii. Non-zero positive Additional Interest Rate of 0.01% is guaranteed for the entire policy term on the policy account value and the corresponding interest amount, after allowing for Fund Management Charge (FMC) along with applicable service tax and education cess on FMC will be credited to the Policy Account at the end of every financial year/time of separation, whichever is earlier, on a pro-rata basis. At each interval, after the minimum floor rate is credited, the non-zero positive additional interest rate shall be credited to the balance of the policy account value.
- iii. Non-zero positive residual additions, if any, shall be credited to the policy account value in order to meet the maximum reduction in yield as stipulated in regulation 37 of IRDA (Linked Insurance Products) Regulations, 2013 at the end of each policy year starting from policy year 5 or maturity date whichever is earlier.

Withdrawals for members other than scheme rules are not allowed. Separation includes death / disability of employee in service, retirement / early termination / resignation of employees, withdrawals for any other reasons as per scheme rules from the Policy Account and the Surrender of Policy.

The premium with respect to this product shall be made in accordance with the Actuary's certificate submitted by the employer in accordance with the AS15 (Revised). Where the fund is overfunded/in surplus as per such certificate, the insurer may allow "nil contributions/premiums" under the policy and in all such cases, the policy shall not be treated as discontinued.

Even on non-receipt of premium the policy will automatically get renewed at the then existing terms and conditions on each renewal date.

The policy will be renewed through endorsement and a suitable communication will be sent to the policyholder.

No top-ups allowed under this product, unless required as per the actuary's certificate in accordance with the AS15 (Revised), to address the underfunding of the scheme.
