A. Preamble

Whereas the Insured named in the Schedule hereto by a proposal and declaration together with any statement, report and/or other document has applied to SBI General Insurance Company Limited ("Company") and has paid the premium as consideration for insurance which has been realized by the Company, in respect of happening of an event upon which one or more benefits become payable under this Policy during the period of Insurance stated in the Schedule.

B. Scope of Cover

The Company hereby agrees, subject to the terms, conditions and exclusions herein contained, or otherwise expressed herein, to compensate the Insured, in the manner specified in the Schedule, for the shortfall in yield as stated in the Policy, resulting from peril specified under "Risks covered" and within the Insured Area and Policy Period, subject to the maximum Sum Insured specified in Part I of the Schedule to this Policy in the manner specified.

The insurance shall operate on the principle of "Area Approach" in selected notified Reference Unit Areas. Area Approach signifies that a "Reference Unit Area" shall be considered as a Unit-Area of Insurance for the purpose of acceptance of risk and assessment of compensation as well. Therefore, all insured-cultivators of a crop notified by government in the notified Reference Unit Area shall be deemed to be on par so far as their terms of insurance coverage and assessment of compensation are concerned.

C. Definitions

- 1. Proposal means any signed Proposal by filling up the questionnaires and declarations, written statements and any information in addition thereto supplied to The Company by Insured or on his behalf, which has enabled the Company in considering whether and on what terms to offer this insurance.
- 2. Policy means the Proposal, Policy wording, the Schedule and any applicable Endorsement or memoranda attaching to or forming part thereof.
- 3. Schedule means the latest Schedule issued by the Company as part of Your Policy. It provides details of the level of cover the Insured has.
- 4. Endorsement means any alteration made to the Policy which has been agreed to by the Company in writing.
- 5. Insured means the persons who are incorporated as Insured/s in the Schedule of the Policy for the purpose of insurance coverage.

- 6. Exclusion means the damages/ perils/ properties/ contingencies which are not covered under the Policy and for which the Company has no liability in the event of loss occurrence.
- 7. Policy Period means the period commencing from the effective date and hour as shown in the Policy Schedule and terminating at midnight on the expiry date as shown in the Schedule of the Policy.
- 8. Sum Insured means the monetary amount of coverage mentioned in the Schedule of the Policy. This is the maximum amount that the Company will pay under this Policy.

In case of Loanee farmers, the Sum Insured would be at least equal to the amount of crop loan sanctioned/advanced, which may extend up to the value of the Threshold Yield of the insured crop at the option of the insured farmer. Where value of the Threshold Yield is lower than the loan amount per unit area, the higher of the two is the Sum Insured.

Multiplying the Notional Threshold Yield (district/ region/ state level) with the Minimum Support Price (MSP) of the current year arrives at the value of the Threshold Yield. Wherever Current year's MSP is not available, MSP of previous year shall be adopted. The crops for which, MSP is not declared, farm gate price established by the marketing department/board shall be adopted.

For farmers covered on voluntary basis the Sum-Insured is up to the value of the Threshold Yield of the insured crop. If the farmer so desire he may be provided with higher level of risk coverage.

- 9. Area under cultivation would always be expressed in terms of 'hectare'. An individual Cultivator's 'area under cultivation' (in hectare) for a Notified Crop in a notified Reference Unit Area shall be declared by him as follows:
 - i. Loanee Applicant Cultivators: 'Area under cultivation' for the Notified Crop as already declared by him in the Loan Application Form for the purpose of fixing his "Maximum Borrowing Limit [MBL]" by the Lending Financial Institution.
 - ii. Non-Loanee Cultivators The cultivator shall declare the 'area under cultivation' for each Notified Crop in the Insurance Proposal form.
- 10. The Threshold yield (TY) or Guaranteed yield for a crop in an Insurance Unit shall be the average yield of the preceding 7 years excluding the year(s) in which a natural calamity such as drought, floods etc. may have been declared by the concerned Government/authority, multiplied by level of indemnity. However, it may be ensured that at least 5 years' yield data is available for calculating the threshold yield.
- 11. The Actual yield (TY) means the actual yield on particular crop calculated through CCEs or any other accepted method.
- 12. Crop Cutting Experiments (CCEs) means required number of experiments planed and conducted by government in order to assess the actual crop yield.

In instances where required number of CCEs could not be conducted due to non-availability of adequate cropped area, the yield data for such units can be generated by Insurer by proxy indicators, such as clubbing with neighbouring I contagious units, adopting yield of next higher unit, yield data generated by correction I correlation factor with next higher unit, etc.

13. A level of Indemnity is one which is specified in the Policy Schedule.

14. You/ Your/ Yourself" - means the Insured who is named in the Policy Schedule.

D. Risks Covered

1 Standing crop (sowing to harvesting)

Comprehensive risk insurance is provided to cover yield losses due to non-preventable risks, viz.:

- I. Natural Fire and Lightning
- II. Storm, Hailstorm, Cyclone, Typhoon, Tempest, Hurricane, Tornado etc.
- III. Flood, Inundation and Landslide
- IV. Drought, Dry spells
- V. Pests/ Diseases etc.

2 Prevented sowing/planting risk

In the event the Insured farmer is prevented from sowing/planting in the Insured Area due to deficit rainfall or adverse seasonal conditions, such insured farmer who failed to sow/plant (but otherwise has every intention to sow/plant and incurred expenditure for the purpose), shall be eligible for indemnity. The indemnity payable would be a maximum of 25% of the Sum-Insured. The scale of payment for different crops will be worked out by implementing agency in consultation with experts.

3 Post harvest losses

Coverage is available only up to a maximum period of two weeks from harvesting for those crops which are allowed to dry in cut and spread condition in the field after harvesting against specific perils of cyclone and cyclonic rains and unseasonal rains.

E. General Exclusions

The Company will not pay for

- 1. War Risk: Loss as a consequence of war, invasion, act of foreign enemy, hostilities (whether war be declared or not) civil war, rebellion, revolution, insurrection, military or usurped power, confiscation, nationalisation, civil commotion, in connection therewith.
- Nuclear Risk: Any loss to property, consequential loss, legal liability or bodily injury, illness, disease
 directly or indirectly caused by or contributed to or arising from ionising radiation or contamination
 by radioactivity from any nuclear fuel or from any nuclear waste from the combustion of nuclear
 fuel or the radioactive, toxic, explosive or hazardous properties of any nuclear assembly or nuclear
 component.
- 3. Consequential Loss: Consequential loss of any kind or description.

- 4. Expenses Incurred: Any expenses whatsoever incurred by an Insured in connection with or in respect of any loss, howsoever caused, even if such loss results in diminished agricultural output/yield.
- 5. Malicious damage and other preventable risks.
- 6. Terrorism: Any loss to crop or asset on account of terrorist activities.

F. Nature of Coverage and Indemnity

I. Wide spread calamities

If the 'Actual Yield' (AY) per hectare of the insured crop for the defined area [on the basis of requisite number of Crop Cutting Experiments (CCEs)] in the insured season, falls short of the specified 'Threshold Yield' (TY), all the insured farmers growing that crop in the defined area are deemed to have suffered shortfall in their yield.

```
'Indemnity' shall be calculated as per the following formula:

[Shortfall = 'Threshold Yield - Actual Yield' for the Defined Area]

Shortfall in Yield

X Sum Insured for the farmer

Threshold yield
```

II. On account payment of claims

In case of adverse seasonal conditions during crop season, claim amount up to 25 percent of likely claims would be released in advance subject to adjustment against the claims assessed on yield basis. The on account payment will be considered only if the expected yield during the season is less than 50 percent of normal yield. The criteria for deciding on-account payment of claims shall be based on proxy indicators such as weather, agro-meteorological data/satellite imagery/acreage damaged or such other indicators to be decided by the Government, and will be implemented in States and for crops for which such proxy indicators can be established.

III. Prevented sowing/ planting claims

The extent of claims payable will be decided in respect of the insurance unit area on the basis of rainfall position issued by the concerned Indian Meteorological Department (IMD) for the area during the sowing season and acreage-sown particulars issued by the State Government. Other authentic rain gauge stations which the government shall install for the purpose/insurer/insurer nominated agencies can also be considered for the purpose of measuring rainfall. The maximum claims payable will be 25 percent of the sum-insured. Having received indemnity based on prevented sowing/planting, the insurance cover is automatically terminated.

Notified Insurance Units will be eligible for "Prevented Sowing/ Planting" pay-out only if more than 75% of Crop Sown Area for notified crop remained unsown due to occurrence of any of the above perils.

IV. Post harvest losses

Coverage is available only for those crops, which are allowed to dry in the field after harvesting

against specified perils of cyclone in coastal areas, resulting in damage to harvested crop lying in the field in 'cut & spread' condition. In other words, the crop, which after harvest is left in the field for drying, is only covered against the peril specified above. The state/ UT concerned will bring out the list of such crops in consultation with Implementing Agency. The harvested crop bundled and heaped at a place before threshing is beyond coverage under post harvest losses. Further, the coverage is available only up to a maximum period of two weeks (14 days) from harvesting. Assessment of damage will be on individual basis.

V. Localized risks

The losses would be assessed on individual basis in case of loss/damage resulting from occurrence of identified localized risks viz., hailstorm, landslide and Inundation affecting isolated farms in the notified area. The cost of inputs incurred until the time of occurrence of peril, and the expected loss in final yield due to the peril, would form the basis for loss assessment.
